KIELCE - A NATURAL FITCITY

Nature has blessed Kielce with amazing assets. This city of nearly 200,000 inhabitants set in the Świętokrzyskie Mountains is often called “the largest outdoor geology museum in the world” due to the rich geological formations here which reveal to visitors the world as it was hundreds of millions of years ago. Kielce is also the highest-situated voivodeship capital in Poland, with the highest point on the map of Kielce - Telegraph Hill - standing at 406 metres above sea level. The varied terrain makes the area perfect for spending time actively in the great outdoors, and the area is well equipped with municipal and pedestrian paths, cycling trails (including the Green Velo Eastern Cycling Trail), nature discovery and educational trails, two ski slopes, and the interesting attractions at Kadzielnia, including the Underground Tourist Route, the Treetop Scenic Route zip line, a waterfall, climbing routes and an amazing winter icefall.

While spending your time actively, why not enjoy the cultural riches of the area by visiting the numerous museums and galleries, watching a theatrical or dance performance, or taking in a concert at the Philharmonia or Kadzielnia Amphitheatre?

Kielce is a large and dynamically expanding academic and business centre too, where a dominant role is played by the Kielce Trade Fairs. The city is also known for its sports teams, including the top-flight Ekstraklasa clubs of PGE Vive Kielce (handball) and Korona Kielce (football). The enthusiastic support of local fans and the city authorities helped the city win the title of European City of Sport 2018.

Come and visit Kielce, a NATURAL FITCITY!

ACTIVE TOURISM - THE ENERGY OF THE CITY

Kielce is perfect for anybody who loves adrenaline and wants to spend their time actively, and it offers attractions that no other city in Poland can match. Tourists in Kielce can walk, run, go wild on mountain bike trails, visit caves, see a waterfall and, for dessert, zoom down a zip line above a former rock quarry with Szmaragdowe Lake below and rock formations which are actually the remnants of an ancient coral reef seemingly just within arm's reach! And all of this just 1.5 kilometres from Kielce's market square.

Visitors have at their disposal a network of hiking and cycling trails as well as educational paths. We especially recommend the "Tour de Kielce" route, a 59km-long yellow trail which lets you discover the city from every angle. In Kielce, you can experience outdoor adventures while at the same time gaining knowledge, thanks to many strategically placed educational notice boards or by using an insightful local tourist guide.

Kadzielnia Zip Line

KIELCE - A PARADISE FOR KIDS

Kielce is also a fantastic city for making children's dreams come true, and for reigniting adults' fond memories of their childhood years. The modern GeoEducation Centre shows how the world looked millions of years ago, while at the Energy Science Center making your own energy becomes child's play. And then there's the Museum of Toys and Play, where you can discover the history of the toys that children play with all over the world. Many attractions for the younger visitors to Kielce and the vicinity are all brought

together in a project entitled "Kielce - A Paradise for Kids", which is comprised of various thematic groups, including "Fun for Tots", "Land of Explorers", "Magical Fun", "On the Trail of History", "Water Wonderland", "Mysteries of Nature", "Winter Wonderland", "Friends of Animals" and "By Bike or On Foot". Just take a look at the website www.rajdladzieci.kielce.eu and choose the option that interests you.

BUSINESS TOURISM - ACTION AND REGENERATION

The magnet attracting business people to the Świętokrzyskie voivodeship are the Kielce Trade Fairs.

Approximately 276,000 visitors from nearly 60 countries and representing 7,000 companies come each year to the Fairs, which include some of the leading fairs in Central and Eastern Europe. The Trade Fair calendar includes more than 70 annual events, comprising trade shows, exhibitions and 700 conferences.

Business people can also find attractive propositions for

spending their after-hours time. It's well worth having a look at the offers below and making an appointment with a tour guide who can show you all the most interesting nooks and crannies of the city.

If you're interested in a full-day cycling trip, we recommend the yellow cycling trail around Kielce, which covers nearly 59 kilometres. Riding along this trail will give you the chance to discover many of the green areas and vantage points over the city and the Świętokrzyskie Mountains.
